DETAILED ACTION

1. In response to the Communications dated July 15, 2003 through August 08, 2003, claims 1-8 are active in this application.

Foreign Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a) (d), which papers have been placed of record in the file.

Information Disclosure Statement

3. The information disclosure statement filed July 15, 2003 has been considered.

Claim Objections

4. Claims 2-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections – 35 U.S.C. § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2818

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

6. Claims 1 and 7 are rejected under 35 U.S.C 102(b) as being anticipated by Schubert [U.S. Patent #4,788,492].

With respect to claim 1, Schubert discloses a circuit element comprising: an input for receiving an external clock with a clock period duration [see 2nd paragraph of the "Description of the Preferred Embodiment"]; an unit for providing the circuit element with information representing the clock period duration of the external clock [the clock channels – see the 2nd paragraph of the "Description of the Preferred Embodiment"]; a unit for the temporal control of at least one signal in the circuit element on the basis of the information representing the clock period duration [the temporary memories – see the 2nd paragraph of the "Description of the Preferred Embodiment"].

With respect to claim 7, Schubert discloses that the circuit element is a memory element. See the figure.

Allowable Subject Matter

7. The following is an Examiner's statement of reasons for the indication of

Art Unit: 2818

allowable subject matter: the prior art of records does not show (in addition to the other elements in the claim) the following:

- ❖ Wherein the unit for the temporal control of the at least one signal on the basis of the information representing the clock period duration and on nominal time information ascertains a number of clock cycles or fractions of clock cycles of the external clock by which the input signal is to be delayed so as to control temporally the at least one signal.
- ❖ Wherein the unit for providing the information representing the clock period duration of the external clock includes a memory for storing data representing a clock period assigned to a clock frequency.
- ❖ Wherein the unit for the temporal control of the at least one signal has a phase-locked loop for generating a multiple of the external clock frequency in the circuit element.
- ❖ Wherein the unit for the temporal control of the at least one signal has a delayed locked loop for adjusting a delay on the basis of the clock frequency information provided.
